

Need Biomedical Research Services?

The SDSU HealthLINK Center can help!

Sample Storage (Short or Long Term)

4 °C -20 °C -80 °C

Sample Analysis

DNA Extraction
PCR
qPCR

Sample Collection & Processing

Blood
Microbial culture

Examples of what we offer:

- Purification of nucleic acids and proteins essential for drug discovery, disease diagnosis, and next generation sequencing
- Imaging live cells
- Quantifying glucose, A1c, and drug levels in plasma, blood, or urine
- Quantifying bacterial, viral, and fungal abundance in environmental and/or biospecimen samples
- Identifying and quantifying genetic mutations
- Cloning your favorite gene
- Consultation on laboratory information management systems
- Consultation on biomedical protocol optimization and experimental design best practices
